

Optimized for Industry

Managing Engineering Drawings in an All Macintosh Environment

Canatxx

“Optix’s native Mac support meshed perfectly with our environment and was easily expanded to include remote users at our UK office.”

Amanda Hill
System Administrator

Founded in 1988, Canatxx specializes in the design, construction, and management of innovative energy technologies and projects. Responsible for the development and operation of several overseas energy projects including gas storage and LNG, Canatxx uses Vectorworks CAD software on the Macintosh platform for all their overseas projects.

Their need for a reliable, easy-to-use and secure system to manage these drawings prompted them to select Optix as the document management and imaging solution for their Macintosh-based organization.

Optix: Opportunity

Canatxx selected Optix to address the following core needs:

- All Macintosh technology environment
- Responsible for managing critical documentation
- Need to quickly design and deploy custom repositories
- Stringent security, reliability, and usability requirements

Optix: Options

Canatxx’s Optix implementation included:

- Optix Server running on back-end Mac OS X Server and integrated with Sybase Active Server Enterprise (ASE) 12.
- Macintosh native Optix client
- Optix drivers for Fujitsu scanners
- Comprehensive, hands-on user training

Optix: Optimized

Canatxx’s key benefits include:

- Complete installation and training in less than a week
- Rapid design of custom indexing screens and databases using Optix’s built-in Screen Generator tool
- No need for expensive development labor to deploy.
- Ability to support remote intercontinental users.
